

FLIGHT RADIAL™

TIME FOR A LITTLE TOUGH TALK.

Goodyear® Flight Radial™ is the radial ply tire for today's high-performance commercial aircraft.

It's our toughest tire and it's the tire chosen by commercial aviation leaders such as Southwest, Air Canada, and Lufthansa. Computer-designed with the demands of high-performance commercial aircraft in mind, this radial ply tire is weight-efficient, fuel-efficient, and cost-efficient.

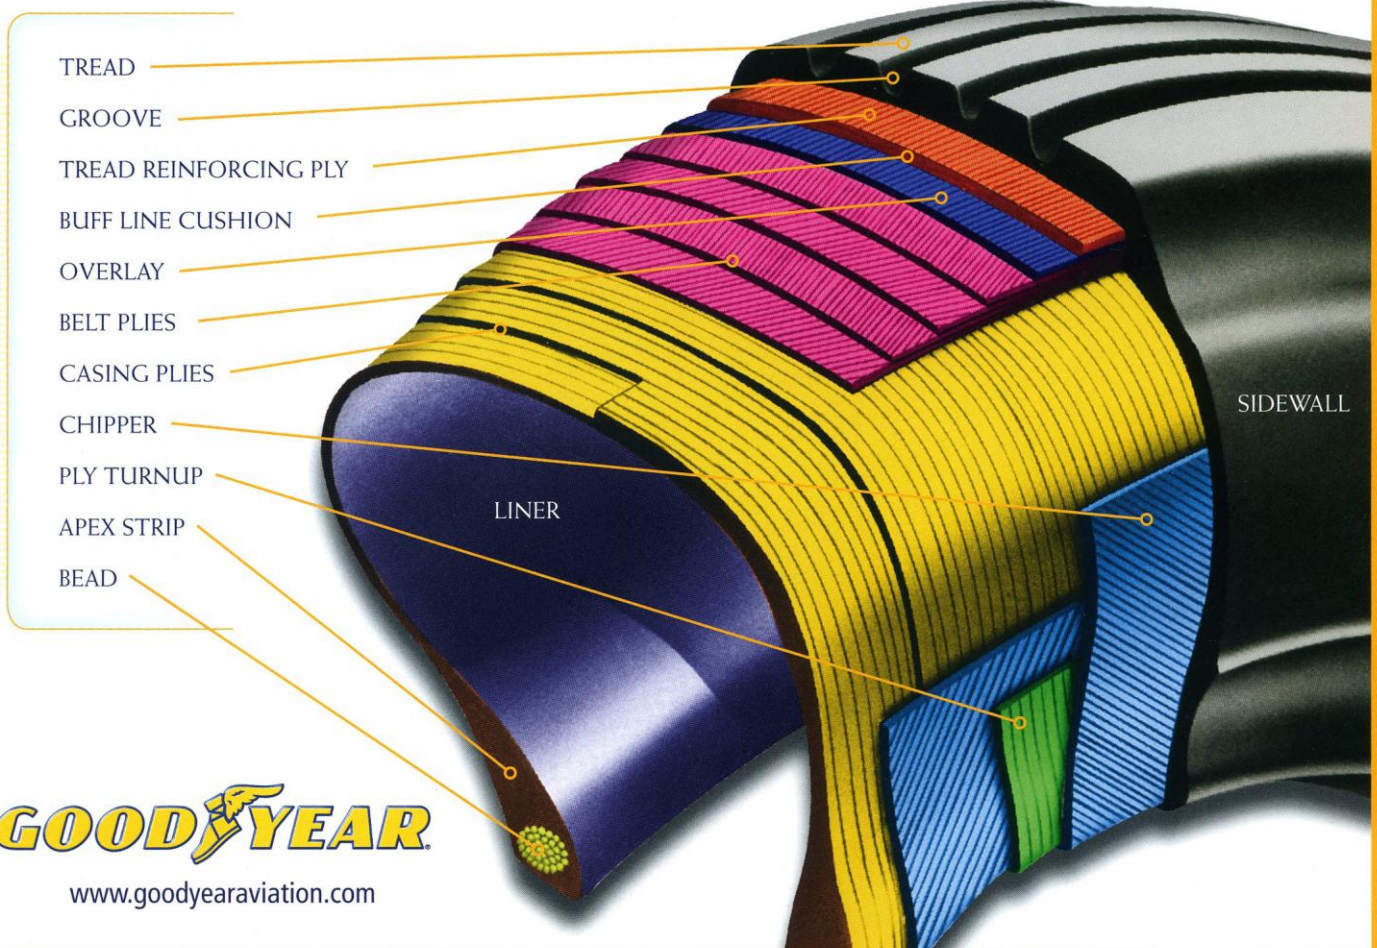

- Strong, rigid belts and tough rubber compounds.
- These help provide greater dimensional stability and cut resistance for longer life and increased landings.

BENEFITS

- 1 Greater dimensional stability for longer life and increased cut resistance
- 2 Increased load-carrying capability
- 3 The most weight-efficient construction for strength and interface with the aircraft wheel
- 4 Fewer tire replacements and lower maintenance costs
- 5 Improved fuel efficiency and reduced operating costs

FEATURES

- 1 Strong, rigid tread belts and improved rubber compounds
- 2 Radial construction
- 3 Special bead design
- 4 Radial design increases tire tread life over conventional bias ply tires
- 5 Weighs up to 20% less than conventional aircraft tires
