September 3, 2014

Goodyear Aviation is pleased to announce that our 8.50-6 6PR tire is now available as a tubeless tire.

We have converted our existing 8.50-6 6PR Aircraft Rib tire from tube-type to tubeless, and it can now be used as either tubeless or tube-type. The new tire is part number 856T61-1 and it has replaced 856C61-3. Existing and future orders for 856C61-3 will be replaced by 856T61-1 as soon as our stock of 856C61-3 is depleted. Both part numbers can be used interchangeably in tube-type applications (with tubes).

Tires are current in-line tires and orders may be placed using the following information:

Size	TT/TL	Part Number	Product Code
8.50-6 6PR	tube-type	856C61-3	301-117-530
8.50-6 6PR	tube-type/tubeless	856T61-1	301-099-030

For questions, please contact your Goodyear sales representative.
